EDUCATION

NORTH-WEST UNIVERSITY

- Bachelor of Science in Information Technology (BSc IT)

SKILLS

Programming:

Main: Java, C#, C++, SQL

Can code: Python, JavaScript, CSS, HTML

Frameworks & Technologies:

NET, ASP.NET, React, Node.js, Express.js, REST API's, Bootstrap, Vite, Spring, Spring Boot, Pandas, LangChain, PyTorch

Databases:

Oracle SQL, Microsoft SQL Server, PostgreSQL, ERD Modeling, Normalization, Schema Design

AI/Analytics:

Knowledge-Based AI Systems, Quantitative Analysis, Decision Support Systems, Excel QM

Networking:

Cisco Packet Tracer, VLANs, ACLs, Router-on-a-Stick, Subnetting, Enterprise Network Design

Tools:

Git, GitHub, Oracle SQL Developer, Visual Studio, VS code, Jupyter, Google Colab

SUMMARY

Junior software engineer at North-West University with hands-on experience across software engineering, AI systems, relational database design, networking, full-stack development, as well as exposure to RESTful web service development using Spring Boot. Drawn to backend engineering, artificial intelligence, ML/LLM, scalable systems, software architecture, and cybersecurity. Very fast and eager learner, easily adapts, works well under pressure and motivated to get things done. Works very well in groups, indicated by experiences.

EXPERIENCE

Software Engineering Practicum

Mayerfeld Consulting

06/2026 - 07/2026

- Collaborated within a real development team to plan, design, and deliver real-world software solutions
- Participated in software architecture discussions, development workflows, and project planning
- Worked with collaborative engineering practices, GitHub workflows, and technical problem-solving
- Contributed to implementation discussions and software delivery processes

Course Representative & Student Assistant for C#

2024 - 2025

School of Computer Science & Information Technology, North-West University

- Represented student concerns and academic feedback between students and faculty
- Assisted in resolving communication and platform issues across modules
- Coordinated with lecturers and academic representatives to improve student experience

PROJECTS

Full-Stack Management System

C# | .NET | SQL

- Designed and developed a layered full-stack management system with CRUD operations and database integration using SCRUM methodologies, with full system documentation and planning evidence.

CERTIFICATIONS

Full-Stack Software Development x2

Software Engineering

AI Engineering Bootcamp

Advanced Java

Comptia Sec+

STRENGTHS

Critical Problem Solving

Leadership & Team Coordination

Analytical Thinking

System Design & Architecture

Technical Documentation

Determined to find a solution!

Oracle Relational Database System

Project Manager & Database Engineer

- Led a 7-member team in designing and developing a large-scale Oracle relational database system
- Designed ERDs, relational schemas, normalization models, and business rules
- Coordinated GitHub collaboration workflows and technical documentation
- Applied SDLC and DBLC methodologies to database architecture and integration

AI Medical Symptom Diagnostic System

Python | Knowledge-Based AI

- Developed an AI-driven diagnostic assistant capable of analyzing user symptoms and predicting possible illnesses
- Implemented rule-based reasoning and symptom-analysis logic

RESTful Web Service

Java Spring Boot - Project on Github

- Designed a RESTful Web Service retrieve, update and delete employee information.
- The API was designed using Java Spring Boot for easy configuration and unit tested using Postman.

IMPORTANT DEGREE MODULES

Data Structures & Algorithms - Java

Advanced Systems Analysis & Design

Discrete Mathematics

Advanced Database Engineering

Computer Networks

Decision Support Systems

Information Security

Statistics & Data Analysis

Operating Systems

OOP - Java

Advanced Web & Mobile Application Development - C#
